

## Summary of the Closing Session

Chairman : Francis Perez

The first point of this session was the discussion about the possibility of a joint EU-US RF Workshop. From the discussion three points were made clear:

- 1) There is interest from the community on such workshops.
- 2) These joint workshops should be focalised on specific items.
- 3) The general European RF Meeting should continue as it is now.

It was pointed out that in fact the PSI (Switzerland) together with the APS (USA) are organising a meeting that fits with the proposal: the "3<sup>rd</sup> CW and High Average Power RF System Users Group Meeting". The PSI will send an invitation to all the participants.

In addition, it was supported the organisation of a joint EU-US meeting at the ESRF in Spring 2005 on the subject "High Power Generation".

The second point was the summary of each chairman, trying to focus on the discussion points at each session. See the summary of each session.

Finally, it was agreed that the 8<sup>th</sup> European Synchrotron Light Source Radiofrequency Meeting, on year 2004, will be organised by ASTeC, Accelerator Science and Technology Center, at Daresbury Laboratory.
